## ELECTRICAL ENGINEER

A vacancy exists in the Buildings & Structures Sector for an Electrical Engineer to commence duties in the East London office, as soon as possible. This position will report to the Sector Operations Manager in Port Elizabeth.

### Main Responsibilities

- Project work including detail design, compilation of bills of quantities, tender compilation
- Site supervision and attending of site meetings
- Project related management duties
- Support in the execution of other engineering projects in SSI
- Client liaison and business development

### Minimum Qualifications, skills and experience

- BSc Electrical Engineering or B-Tech Electrical Engineering
- PR. Eng or PR Tech registration or eligibility for registration with ECSA
- 4 - 7 years experience as an Electrical Engineer / Technologist in a consulting engineering environment
- Good experience in distribution networks in buildings including lighting layouts, distribution board design and circuit breaker grading, volt drop calculations and cable design criteria
- Experience in refurbishment projects would be an advantage i.e.: RAM Projects
- Must have own transport and a valid SA drivers licence

### Behavioural Competencies

- Ability to work under pressure
- Ability to work under minimum supervision
- Team player
- Pro-active and innovative thinker
- Willing to travel from time to time
